

Dear Bloomfield Village Resident,

I am writing to you on behalf of an Independent Road Committee that was formed by a group of concerned Bloomfield Village Residents for the purpose of taking a fresh perspective on the condition of the roads and with finding a long-term solution for our neighborhood. Following the previous road proposal, we felt that it was necessary to start the process from the beginning in order to provide our residents with a range of options and an accurate estimate based on the current market environment. We have spent the last few months meeting with the Road Commission for Oakland County as well as Bloomfield Township and we recently presented our findings to the Bloomfield Village Association Board of Trustees.

Based on our findings, which has the support of the Board of Trustees, we have enclosed a standard form provided to us by the Road Commission for Oakland County. The purpose of the Expression of Interest is to gauge resident interest in order for the Road Commission for Oakland County to commence a comprehensive study to provide the association with an accurate estimate for improving our roads. I want to make it clear that there is NO financial impact to residents and NO signature is binding. In order for the road commission to provide us with a FREE estimate we need to provide them with an Expression of Interest.

The Expression of Interest is an accumulation of signatures of residents "interested" in improving our current village roads. Streets having 51% or greater homeowner interest in improving their road, by signing and returning the enclosed Expression of Interest document, will be included in the FREE comprehensive study. There is NO financial obligation to a homeowner that chooses to sign the Expression of Interest and it does not obligate you to participate once the cost study is completed. With this information, the Road Commission for Oakland County will be able to determine where interest for road improvement exists by individual roads. The Road Commission will then proceed to do a preliminary engineering study with road testing and analysis to determine costs and feasibility all at NO cost to any resident. This study will take up to 2 years to complete. At that time, any and all financial options will be presented to Village residents.

Please sign and return the attached Expression of Interest by December 31, 2015 in the enclosed, stamped envelope. All questions and concerns are appreciated by the road committee and should be directed to the Village Trustees in your District. A copy of the minutes from our Independent Road Committee meetings can be found on the Bloomfield Village Association website [www.bloomfieldvillage.net](http://www.bloomfieldvillage.net). Please note that we will not have any financial information available until the engineering study is complete.

Sincerely,

Sean Metrose

Bloomfield Village Resident
