

**The New Bloomfield Village Road Committee
Bloomfield Village Board Report ~ Update
January 19, 2016**

Members of the New Bloomfield Village Road Committee gathered to count and record Expression of Interest Forms received in hopes of submitting them to the Road Commission of Oakland County. It was determined that there were many village residents who did not yet acquire a 51% representation per their street(s) in order to receive the RCOC opportunity for a FREE and NON-BINDING engineering study of their road condition. The committee decided not to proceed with delivery of the forms to the RCOC at this time. It was determined that the committee will reach out to encourage further village resident participation through The Village Bulletin, a blast email, and neighborly conversations. As a note of clarification, the committee does have enough Expression of Interest Forms to submit to the RCOC in order to get a road engineering study to commence, however, many streets would be left out of the study at this given time. The Bloomfield Village Board supports our endeavor and endorses the committee efforts to receive as many Expression of Interest Forms as possible from the current village residents.
